

ritní informovat včas ženy o možnostech, jak plodnost a/nebo funkci vaječníků zachovat. Problematika onkofertility vyžaduje úzkou spolupráci mezi onkology a specialisty prac-

višť reprodukční medicíny. Zachování fertility by mělo patřit mezi základní předpoklady komplexní a kvalitní multidisciplinární péče o premenopauzální pacientku s karcinomem

prsu. Možnost mít vlastní děti je obrovská motivace a naděje pro mladé ženy, které se ocitly v těžké životní situaci vzhledem k nečekané diagnóze karcinomu prsu.
